Lab 3

Masana Nashimoto

Shinyapps: https://mnashimoto.shinyapps.io/lab_3/

For this lab, I downloaded a csv dataset from Kaggle with various car data with anywhere from sales to fuel efficiency of each car model. So, I have decided to scatterplot this data to compare what factor affects the sales of the cars. In this web app, I have included radio button and slider bar to compare car sales vs. price of car and fuel efficiency using the ggplot.
